

Tim Bradley

Vice President, Information Technology
Belco Community Credit Union

Tim Bradley, Vice President of Information Technology for Belco Community Credit Union is committed to providing the most efficient and secure technology to members, employees, and credit union operations.

In the fast-changing landscape of financial institute technology, Tim has led the credit union through many important changes that ensure safety and security across the board. Notably, Tim oversaw the moving of the credit union's core system to the cloud (EASE), along with restructuring the IT Department, expanding the Information Technology Help Desk and guided the creation of a SharePoint intranet portal.

Additionally, Tim led the way in migrating a large part of Belco's workforce to remote systems during the COVID-19 pandemic. This effort successfully moved more than 175 people to a remote environment without sacrificing the quality and efficiency of work done by Belco employees every day.

During his tenure Tim and his department have maintained a 98% satisfaction rate among internal customers; consistently pushing the envelope to deliver the best processes to accomplish Belco's needs.

Tim holds an MBA in Business Administration and Technology from Lebanon Valley College as well as a Bachelor of Science in Environmental Health and Safety from Millersville University.

He is currently working toward his DBA in Business Administration through Taft University.

Along with these academic accomplishments, Tim has successfully completed the following areas of Microsoft training: Teams, Office 365, and SharePoint. He has also held a Lean Six Sigma Black Belt and is a graduate of Project Management Institute Training.

Tim and his department have also received the highest possible rating from the 2021 Department of Banking Audit.
